SKILLS

Frontend: React, Next.js, Angular, Tailwindcss, TypeScript, Shadcn, Material UI

Backend: Node.js, NestJS, Express, Python, Java (Spring-boot), Golang, GraphQL, REST APIs

Databases: PostgreSQL, MySQL, NoSql

DevOps & Cloud: AWS, Docker, VPS & self-hosted infrastructure, CI/CD, GitHub Actions

Tools & Practices: Git, Agile/Scrum, Remote collaboration

AI: AI-assisted development (GitHub Copilot), LLM APIs (OpenAI, Claude), AI integration in production web systems

LANGUAGES

- English (Fluent)
- French (Native)

HOBBIES

- Reading tech books
- Travels
- Watch and play soccer football

SUMMARY

Fullstack Software Engineer with 6+ years of experience building and scaling SaaS products. Strong in modern frontend and backend technologies, including **Nodejs, React, Next.js, NestJS, GraphQL, and PostgreSQL**, with hands-on exposure to AI-enabled features, cloud infrastructure, and DevOps practices.

Delivered **production-ready systems** in remote Agile teams, collaborating closely with cross-functional stakeholders to drive iterative development and successful product launches.

WORK EXPERIENCE

Moso (Remote, US-Based) Software Engineer

JUN 2024 - DEC 2025

- Contributed to the development of a **crypto-rewards ecosystem** spanning a Chrome extension and web platforms, enabling users to earn cryptocurrency through partner merchants.
- Built and maintained core product features across frontend and backend using **React, Next.js, TypeScript, NestJS, and GraphQL**.
- Developed and extended **GraphQL APIs** with **NestJS, Drizzle, and PostgreSQL** to support merchant integrations and core business flows.
- Delivered end-to-end features including **authentication, search, referrals, leaderboards, and crypto reward flows**, including Web3 wallet integration.
- Supported **CI/CD pipelines** with GitHub Actions and collaborated in a **fully remote, US-based Agile team**, leveraging AI-assisted tools to improve delivery speed and code quality.

Tech Stack: NX Monorepo, Nodejs, Next.js, NestJS, GraphQL, PostgreSQL, Drizzle, Tailwind CSS, Shadcn UI, Storybook, Docker, wagmi, Tomo EVM Kit, AWS

Chapmail

2023 - PRESENT

Founder

- Built and launched an **Email SaaS platform** enabling developers to send transactional emails via a single REST API (<https://chapmail.io>)
- Migrated the email delivery system from **AWS SES to a self-hosted Mailcow infrastructure**, significantly reducing monthly costs while maintaining reliability.
- Implemented **domain and DNS management**, including **DKIM** and **SPF**, improving email deliverability from **80%** to **95%**.
- Designed and built a **user dashboard** for managing domains, email templates, and API keys, **reducing support requests by 40%**.
- Integrated **Stripe subscriptions** to manage billing, plans, and customer lifecycle.
- Leveraged **AI-assisted development tools** to accelerate delivery and improve code quality (refactoring, testing, and documentation).

Tech Stack: Nodejs, NextJs, Nestjs, Apollo Client, Stripe, Material UI template, Nodemailer, Mailcow, Docker, Selfhosted VPS

MedTruly (Remote, US-Based)

FEV 2022 - MAY 2024

Fullstack Engineer

- Contributed to the development of a **large-scale Electronic Health Record (EHR)** system used by healthcare professionals.
- Built and maintained frontend features using **React, Next.js, and Material UI**, focusing on usability and performance.
- Developed **high-performance GraphQL APIs** using **Golang and the entgo framework**, optimizing queries for large datasets.
- Integrated **AWS S3** for secure document storage and contributed to **PDF generation features**, including image embedding.
- Worked within **CI/CD pipelines and automated testing workflows**, achieving ~90% test coverage for critical features in a **fully remote, US-based Agile team**.

Tech Stack: NextJs, React, Material UI, Apollo Client, Golang, entgo framework, AWS, Docker, N8N

Moravio (Remote)

SEP 2023 - DEC 2023

Freelance React/Next.js Developer

- Worked on fixing production bugs
- Wrote test with **react testing library** to ensure code quality and maintenance
- Took part in rigorous code reviews

Tech Stack: NextJs, React, Material UI, monorepo, React Testing Library

Datnek

SEP 2019 - AUG 2021

Fullstack Engineer

- Developed the backend API for an online learning platform with **Nest.js** Framework, and implemented **CI/CD with Azure**
- By playing a **full-stack** role working with a team of 5 developers, I lead the development of the online learning platform with **Angular Framework** and **Python** with **Flask Framework**
- Led a team of four frontend developers in creating Delencio, a platform designed to connect workers with employers.
- Implemented a **socket.io communication** and integrated a "meet module" using agora Framework
- Conducted **rigorous code reviews** to promote high security, code quality, and design standards.

Tech Stack: Python, Flask, NextJs, Angular, Nodejs, Nestjs, Typescript, socket.io, Git, Azure

Futher Market

AUG 2019 - MAY 2020

Web Developer

- Built and deployed** the documentation website of the FMScript language (FMScript is the language developed and used by Futher Market to build their apps)
- Setup CI/CD** to automatically deploy the documentation Website in the **VPS** of Futher Market
- Implemented a nice UX/UI for **FMScript documentation** website

Tech Stack: Laravel, PHP, HTML5, CSS3, Github Actions, Hosted VPS

EDUCATION

Master's Degree. (Network and DistributedSystems)

SEP 2018 - JUL 2020

University of Dschang, Cameroon

Bachelor's Degree. Computer science

SEP 2015 - JUL 2018

University of Dschang, Cameroon
